SMART CITIES NETWORKING LUNCHEON

Tuesday, October 3, 2017
11:00 AM to 1:00 PM
UTSA Downtown Campus, La Villita Room

The term 'smart cities' broadly refers to the use of data and technology to improve a city's functioning and the livability of its residents. This networking event will afford attendees with the opportunity to meet researchers and practitioners from academia, industry and government who are working to address smart cities related issues. Lunch will be provided.
