

AI AND ANALYTICS NETWORKING LUNCHEON

Friday, August 24, 2018
11:00 AM—1:00 PM
UTSA Main Campus,
JPL Assembly Room (JPL 4.04.22)

Technological advances in computing capability and speed, access to large datasets and the development of innovative algorithms have significantly accelerated the impact of Artificial Intelligence (AI) and Analytics in our daily lives. Despite these advances, creative solutions are still sought for an array of applications including critical infrastructure, cyber security, biomedicine, health care delivery, food security and more.

This networking event will provide an opportunity for researchers and practitioners from academia, industry and the public sector who are working in AI, analytics, machine learning, and autonomy to come together for discussion about current challenges in these fields and development of partnerships to deliver solutions. Lunch will be provided.
