

Health Analytics & Human Performance Networking Luncheon

Friday, May 3, 2019

11:00 AM—1:00 PM

UTSA Main Campus

JPL Assembly Room (JPL 4.04.22)

Advancements in computation, sensing, data collection and analysis have opened the doors to innovations that address challenges in healthcare outcomes and expand our knowledge of human performance. We have an unprecedented opportunity to leverage these technologies and methods to gain a better understanding of our complex biology and physiology, predict and treat disease, improve human performance, and more.

This networking event will provide an opportunity for researchers and practitioners from academia, industry and the public sector who are working in health analytics and human performance to come together for discussion about current challenges in these fields and develop partnerships to deliver solutions. Lunch will be provided.
