Special Guest: Max Green

ABOUT I-CORPS

NSF Innovation Corps (I-Corps) enables teams of scientists, researchers and engineers to explore the commercial potential of their research or innovation. By learning how to assess commercialization opportunities, teams gain a better understanding of their market, customers, competitors and industry.

Other Federal Agencies conduct I-Corps as well:

National Institutes of Health (NIH) I-Corps: <https://sbir.cancer.gov/programseducation/icorps>

Department of Energy (DOE) I-Corps: <https://www.energy.gov/technologytransitions/energy-i-corps>
