

# HOW TO DEVELOP AN EVALUATION PLAN FOR YOUR NSF PROPOSAL

12:00 pm - 2:00 pm | Wednesday, December 6, 2023

VIA ZOOM

Presented by: **Lucy Deckard**, Academic Research Funding Strategies

Consultant Lucy Deckard established Academic Research Funding Strategies, LLC in 2010. She has helped to develop successful proposals to NSF, NIH, the Department of Education, the Department of Defense, and other agencies and foundations, including proposals for large institutional and center-level grants.

In this workshop, we focus on how to develop and write up an evaluation plan for your NSF proposal. We cover how to understand NSF's expectations, when to bring in an external evaluator, how to use logic models to develop a project that is structured for rigorous evaluation. (In this workshop, we focus on developing and describing a strong plan in your grant proposal, not on the details of conducting program evaluation of a funded project.)
