

Developing Strong Education and Outreach Plans for NSF CAREER's Broader Impacts

10:30 am - 12:30 pm | Friday, February 21, 2025

VIA ZOOM

We will discuss best practices for identifying and planning strong outreach and education components to meet NSF CAREER's broader impacts requirements, including what reviewers are looking for, what makes a plan strong, and common mistakes to avoid. We will also discuss differences in expectations for education and outreach scope, depending on the type of grant (e.g., core, CAREER, Center, etc.), and provide examples.

Presented by: Lucy Deckard, Academic Research Funding Strategies

Consultant Lucy Deckard established Academic Research Funding Strategies, LLC in 2010. She has helped to develop successful proposals to NSF, NIH, the Department of Education, the Department of Defense, and other agencies and foundations, including proposals for large institutional and center-level grants.
